- According to the information I found, there is currently no website facility or technical facility in our university for online student registration, student information collection, etc.
- However, students can join each of their preferred Sport Clubs by scanning a QR code and connecting to the relevant Sport Club group, and then the information of those Clubs will be presented to those groups by the authorized party. I only learned that students are connected and informed through that.
- However, at present, our university has a Recreation Center website for Jim and Pool. But it was reported that it is not relevant to the Sport Club.
- There is only a general introduction to the Sports Club through the Student Life link on the NSBM official website. I have summarized them for you in the table above.
